PROJECTS

Highlighted Project: Staci Bonnie Designs

A vibrant graphic design portfolio website, built from scratch to showcase an array of graphic design work. This project not only underlines technical skills but also highlights creativity in creating visually appealing layouts and animations. Key highlights of the project:

- **Technologies Used:** Crafted with HTML, CSS and TypeScript to build a robust and interactive platform.
- **Server Management:** Hosted and managed the website on a self-set Ubuntu server, gaining practical experience in server management.
- **Design Skills:** Designed and implemented visually captivating layouts and animations, significantly enhancing user engagement.
- **Achievements:** Successfully created a robust platform that contributed to the growth of the designer Staci Bonnie's freelance career by attracting more project inquiries and expanding her client base.
